## Chapter 1

# Project Name Source Code

The folders and files for this project are as follows:

...

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">jumbledWordsTest.TestGame</a>	7
<a href="#">jumbledWordsTest.TestLeaderboard</a>	7
<a href="#">jumbledWordsTest.TestUser</a>	7

## Chapter 3

# File Index

### 3.1 File List

Here is a list of all documented files with brief descriptions:

src/ <a href="#">leaderBoard.py</a> . . . . .	9
src/ <a href="#">main_start.py</a> . . . . .	10
src/ <a href="#">readWords.py</a> . . . . .	11
src/ <a href="#">scoreAllocator.py</a> . . . . .	12
src/ <a href="#">settings.py</a> . . . . .	12
src/ <a href="#">user.py</a> . . . . .	14
src/ <a href="#">UserGUI.py</a> . . . . .	16

## Chapter 4

# Class Documentation

### 4.1 jumbledWordsTest.TestGame Class Reference

#### Public Member Functions

- def **test\_correct\_word\_list\_request** (self)
- def **test\_incorrect\_word\_list\_request** (self)
- def **test\_score\_allocator\_easy** (self)
- def **test\_score\_allocator\_medium** (self)
- def **test\_score\_allocator\_hard** (self)
- def **test\_wordValidator** (self)

The documentation for this class was generated from the following file:

- src/jumbledWordsTest.py

### 4.2 jumbledWordsTest.TestLeaderboard Class Reference

#### Public Member Functions

- def **test\_leaderboard\_size** (self)
- def **test\_leaderboard\_sorted** (self)
- def **test\_leaderboard\_topScorer** (self)
- def **test\_leaderboard\_topScorer** (self)

The documentation for this class was generated from the following file:

- src/jumbledWordsTest.py

### 4.3 jumbledWordsTest.TestUser Class Reference

#### Public Member Functions

- def **test\_addUser** (self)
- def **test\_updateUser** (self)
- def **test\_keepHighestUserScore** (self)

The documentation for this class was generated from the following file:

- src/jumbledWordsTest.py

## Chapter 5

# File Documentation

### 5.1 src/leaderBoard.py File Reference

#### Functions

- def `leaderBoard.getScores ()`  
*getScores function*
- def `leaderBoard.getLeaderboard ()`  
*getLeaderboard function*
- def `leaderBoard.show ()`  
*show function*

#### 5.1.1 Detailed Description

##### Author

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title LeaderBoard

##### Date

April 4, 2021

#### 5.1.2 Function Documentation

##### 5.1.2.1 getLeaderboard()

```
def leaderBoard.getLeaderboard ( )
```

getLeaderboard function

This function is used to gets the top 10 highest scores

##### Returns

a list with the top 10 users

### 5.1.2.2 `getScores()`

```
def leaderBoard.getScores ( )
```

`getScores` function

This function is used to get all the scores from the `userData.json` file

#### Returns

a list of users and their scores

### 5.1.2.3 `show()`

```
def leaderBoard.show ( )
```

`show` function

function is used to display the leaderboard

## 5.2 `src/main_start.py` File Reference

### Functions

- def `main_start.start_main_page` ()  
*start\_main\_page*

### Variables

- string `main_start.gameMode` = ""
- string `main_start.difficulty` = ""
- `main_start.username` = None

### 5.2.1 Detailed Description

#### Author

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title main\_start

#### Date

April 4, 2021

### 5.2.2 Function Documentation

#### 5.2.2.1 start\_main\_page()

```
def main_start.start_main_page ( )
```

start\_main\_page

function is used to start and display the main menu page and initializes everything in order for the game to work

## 5.3 src/readWords.py File Reference

### Functions

- def [readWords.getWords](#) (category, difficulty)  
*getWords function*

#### 5.3.1 Detailed Description

##### Author

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title Read Words

##### Date

April 4, 2021

#### 5.3.2 Function Documentation

##### 5.3.2.1 getWords()

```
def readWords.getWords (
    category,
    difficulty )
```

getWords function

This function is used to get a list of words based on category and difficulty level

##### Parameters

<i>category</i>	is a string representing the desired category
<i>difficulty</i>	is a string representing the desired difficulty level

**Returns**

a list of stings which represents words based on category and difficulty level

## 5.4 src/scoreAllocator.py File Reference

**Functions**

- def `scoreAllocator.addScore` (difficulty, points)  
*addScore function*

### 5.4.1 Detailed Description

**Author**

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title Score Allocator

**Date**

April 4, 2021

### 5.4.2 Function Documentation

#### 5.4.2.1 addScore()

```
def scoreAllocator.addScore (  
    difficulty,  
    points )
```

addScore function

This function is used to allocate score to the user based on difficulty level

**Parameters**

<i>points</i>	is an integer representing the number of points
<i>difficulty</i>	is a string representing the desired difficulty level

**Returns**

an integer representing the total number points in one session

## 5.5 src/settings.py File Reference

## Functions

- def **settings.back** (main\_window)
- def **settings.optionGameMode** (main\_window, user)  
*optionGameMode function*
- def **settings.optionDifficulty** (main\_window)  
*optionDifficulty function*
- def **settings.start\_game** (args, main\_window)  
*start\_game function*
- def **settings.option** (main\_window)  
*option function*

## Variables

- **settings.username** = None

### 5.5.1 Detailed Description

#### Author

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title Settings

#### Date

April 4, 2021

### 5.5.2 Function Documentation

#### 5.5.2.1 option()

```
def settings.option (  
    main_window )
```

option function

This function is used to display the categories setting page and save the selected category

#### Parameters

<i>main_window</i>	
--------------------	--

#### 5.5.2.2 optionDifficulty()

```
def settings.optionDifficulty (
```

```
main_window )
```

optionDifficulty function

This function is used to display difficulty setting page and save selected difficulty level

Parameters

<i>main_window</i>	
--------------------	--

### 5.5.2.3 optionGameMode()

```
def settings.optionGameMode (
    main_window,
    user )
```

optionGameMode function

This function is used to display the game mode setting page and save the selected game mode

Parameters

<i>main_window</i>	
<i>user</i>	represents the selected user

### 5.5.2.4 start\_game()

```
def settings.start_game (
    args,
    main_window )
```

start\_game function

Once all settings have been selected this method is used to start the game based on the given settings

Parameters

<i>args</i>	
<i>main_window</i>	

## 5.6 src/user.py File Reference

### Functions

- def [user.addUser](#) (username)

- addUser function*
  - `def user.updateScore (username, score)`
    - updateScore function*

## Variables

- string **user.filename** = "data/userData.json"

### 5.6.1 Detailed Description

#### Author

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title User

#### Date

April 4, 2021

### 5.6.2 Function Documentation

#### 5.6.2.1 addUser()

```
def user.addUser (
    username )
```

addUser function

This function is used to add user to database

#### Parameters

<i>username</i>	is a string representing the selected username
-----------------	--

#### 5.6.2.2 updateScore()

```
def user.updateScore (
    username,
    score )
```

updateScore function

This function is used to update the score of selected user to the database

**Parameters**

<i>username</i>	is a string representing the selected username
<i>score</i>	is an integer that represents the score of the user

## 5.7 src/UserGUI.py File Reference

**Functions**

- def [UserGUI.username\\_page](#) (main\_window)  
*username\_page*

### 5.7.1 Detailed Description

**Author**

Muneeb Arshad, Shesan Balachandran, Bill Nguyen @title UserGUI

**Date**

April 4, 2021

### 5.7.2 Function Documentation

#### 5.7.2.1 username\_page()

```
def UserGUI.username_page (  
    main_window )
```

*username\_page*

This function is used to display the username setting page

**Parameters**

<i>main_window</i>	
--------------------	--
